

Trade Show
20 - 22 June 2018

China Pharma Week 2nd edition
19 - 23 June 2018

SNIEC • Shanghai • China

CPhI & P-MEC China is the most comprehensive and pure Pharma focused event to do international pharma business in China and wider Asian region

China's Pharma Market Trends *

1

The Chinese Pharma Market is forecasted to grow at CAGR of 6,9% between 2016 and 2021, reaching RMB 1,084 billion by 2021.

2

China's biosimilars market is expected to expand rapidly, with a growing number of domestic companies targeting the development of biosimilars.

3

Multinational companies will step-up research activity in China and R&D tie-ups between local and foreign partners will become more extensive, contributing to emergence of a more innovative industry.

4

Restructuring of the local industry will gather pace, driven in part by government policies designed to build economics of scale, improve quality standards, enhance innovation and fuel exports in the sector.

* IMS Market Prognosis 2017 - 2021
